Yes - I will --- and will keep Eugenia in the loop as she may become the best POC for them wrt questions since she may be talking to Earl/Alan as well during review period.

Following are EPA/USACE technical experts who should review the FFS:

Earl Hayter
Paul Schroeder
Mark Dortch
Alan Blumberg

Since they will be reviewing specific appendices rather than the whole main text, Beth suggested that perhaps we should just send them a CD of the main text and appendices (no hard copies). Let me know what you think of that idea.

Beth: Will you be confirming with them what we'd like them to review and when their comments will be due? Following is what I was thinking:

Earl Hayter - empirical mass balance and cap-erosion-flood modeling
Paul Schroeder - cap-erosion-flood modeling
Mark Dortch - empirical mass balance
Alan Blumberg - cap-erosion-flood modeling (Eugenia has already talked to him about this and HQI is already sending him hard copy of Appendix G).

I have had to add a member to the Remedial Options WG in response to a direct request. See revised list attached (addition is Carol Johnston, Ironbound Community Corp).
(See attached file: Remedial Options Work Group.doc)

I agree that option C is a good compromise - I would say we can send one copy to each organization (which means 16 copies) plus one to Beth. I've marked the people on the group to send to - we should add in a transmittal letter something to the effect that they are their organization's primary contact on the work group and they are responsible for distributing as appropriate to anyone else who needs to review. I'd like to see your transmittal letter before it goes out.

Let me know if you need addresses.

OK. You and I have discussed the following options for distribution of the public release draft:

- A: ourpassaic only
- B: CD (plus ourpassaic)
- C: Hardcopy main report, CD for appendices (plus ourpassaic)
- D: Full hardcopy (plus ourpassaic)

Page counts are about 200pp for main report, 1900 for appendices.

I like option C b/c it will provide hardcopies of the 6 large poster maps in the main report but not kill too many trees (as in D).

Please let us know what is decided in the next week or so.

Regards,
Scott

Just to continue our discussion of how to distribute the draft FFS to the Remedial Options Work Group, attached are the members of the Remedial Options Work Group. There are 29 members from 15 organizations (including the 6 partner agencies).
(See attached file: Remedial Options Work Group.doc)
